## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Invention I and species 11 (figure 29) in the reply filed on 11/08/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 11-22 are withdrawn from prosecution directed to the non-elected invention/species.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3738

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-6 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Ulmsten et al (US 2003/0114866).

Ulmsten et al teaches a prosthetic repair fabric comprising:  
a body portion of implantable, biocompatible prosthetic material, the body portion including a middle section having a first width and a pair of end portions extending in a longitudinal direction from opposite sides of the middle section, each end portion having a second width that is greater than the first width, wherein the body portion has a generally bow-tie shape.

Regarding claim 10, Prolene is a polypropylene.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mulhauser et al (5,695,525).

Mulhauser et al teaches a prosthetic repair fabric comprising:  
a body portion of implantable, biocompatible prosthetic material, the body portion including a middle section having a first width and a pair of end portions extending in a longitudinal direction from opposite sides of the middle section, each end portion having a second width that is greater than the first width, wherein the body portion has a hourglass shape; see column 4, line 13. An hourglass shape meets the limitations of claims 2-5.

Regarding claim 7, see at least column 5, lines 24 et seq.

Art Unit: 3738

Regarding claim 10, Prolene is a polypropylene.
